- Glasgow, Scotland, UK | +44 7721 898490 | anaswar.ash@yahoo.com | linkedin.com/in/anaswar-ash | github.com/Anaswar-ash

• Professional Summary

- A technically proficient and commercially astute Data & FinTech Analyst with an MBA in Finance and a B.Tech in Computer Science. My core focus is on leveraging data analytics, cloud technologies, and machine learning to solve complex challenges in the financial sector. I specialize in building end-to-end data solutions, from developing predictive models with Python and R to engineering full-stack data applications and visualizing insights with Power BI. Eager to apply my skills in a challenging role focused on financial analysis, quantitative modeling, or FinTech innovation.

• Core Competencies & Technical Skills

• Category	• Skills
• **Data Analytics & BI**	• SQL (PostgreSQL, MySQL), Python (Pandas, NumPy), R, Power BI, Tableau, Advanced Excel, Databricks
• **AI & Machine Learning**	• Time-Series Forecasting (ARIMA, LSTM), Scikit-learn, TensorFlow, NLP (VADER, FinBERT), Deep Learning (CNNs), ONNX, Actuarial/Financial Analysis, n8n
• **Full-Stack & Cloud**	• React, JavaScript, Kotlin, HTML/CSS, API Development (REST), MQL5, Celery, Redis, **AWS (Cloud Analytics)**
• **Business & Strategy**	• Agile (Scrum, SAFe®), Strategic Management (CMI L7), Financial Modeling & Analysis, Bloomberg

• Featured Technical Projects

- **AI-Enhanced MQL5 Trading Bot | GitHub Link**
- **Developed an end-to-end automated trading bot linking a Python-trained neural network to a high-performance MQL5 (MetaTrader 5) Expert Advisor via the ONNX model format.**

- **Implemented a robust model selection process using RandomizedSearchCV with a TimeSeriesSplit to optimize hyperparameters and ensure model validity on chronological financial data.**
- **Technologies: Python, MQL5, ONNX, Scikit-learn, TensorFlow, Panda**

- **Pre-Stocked: Full-Stack Stock Analysis & Forecasting Tool | GitHub Link**
- **Developed a full-stack web application combining time-series forecasting (ARIMA, LSTM) with NLP sentiment analysis (VADER, FinBERT) on Reddit data for hybrid stock prediction.**
- **Engineered a non-blocking, scalable user experience by building a Python-based REST API, using Celery and Redis for asynchronous task processing and PostgreSQL for caching analysis results.**
- **Technologies:** ***Python, React, JavaScript, Celery, Redis, REST API, PostgreSQL, FinBERT, ARIMA, LSTM***
- **Actuarial Analysis: Life Insurance Pricing Model** | GitHub Link
- Built a life insurance pricing model in Python based on actuarial principles, using **CSO Mortality Tables** to accurately calculate risk, premiums, and expected claims.
- **Technologies:** *Python, Pandas, Actuarial Science Principles*
- **Financial Time-Series Analysis: FTSE 100 (2000-2025)** | Python Repo | R Repo
- Analyzed 25 years of historical market data in both **Python** and **R** to identify monthly trends, evaluate optimal investment timing strategies, and visualize findings.
- **Technologies:** *Python, R, Pandas, Data Visualization*
- **App-DTox: Digital Wellbeing & Usage Tracker** | GitHub Link
- Created a digital wellbeing mobile application in Kotlin that tracks app usage with a numerical and statistical approach, providing users with data-driven insights into their digital habits.
- **Technologies:** *Kotlin, Android Development, Data Analysis*

• Professional Experience

- **Key Holder** | Matalan Ltd., UK | *Mar 2024 – Present*
- Spearheaded staff operations by managing and mentoring sales associates, utilizing proven leadership qualities to drive performance, conduct effective training, boost team productivity, and elevate the customer experience through expert complaint resolution and enhanced stakeholder communication in a high-volume retail environment.
- Entrusted with full store operations, expertly executing store opening/closing procedures, daily safe reconciliation, and managing high-volume transactions up to £20,000, consistently achieving and exceeding core KPI's and demonstrating exceptional financial

management.

- **Accounting Assistant** | Group Electrical Engineering, India | *2022 – 2023*
- Processed Accounts Payable/Receivable, maintained ledgers, and performed financial reconciliations.
- Assisted with budgeting, forecasting, and internal audits to ensure financial compliance and accuracy.
- **Business Development Associate Intern** | Think and Learn Pvt. Ltd. (BYJU'S), India | *Mar 2023*
- Managed and optimized leads using CRM platforms including Salesforce and LeadSquared.
- Tracked customer lifecycle interactions and analyzed conversion performance data to inform sales strategies.

Education

- **MBA in Finance (Merit)** | Bangor University, UK | *Sep 2023 – Sep 2024*
- **Relevant Modules:** Corporate Finance, Strategic Planning, Investment Analysis, FinTech, Portfolio Management.
- **B.Tech in Computer Science & Engineering** | Vadakara Engineering College, India | *2018 – 2022*
- **Relevant Modules:** Software Development, Database Systems, Machine Learning, Artificial Intelligence.

Certifications

- **Data Science & BI:**
  - Data Science Essentials with Python (Cisco)
  - SQL Analytics and BI on Databricks
  - Data Analytics Essentials (Cisco)
  - Business Analytics with Excel
  - Power BI for Beginners
  - Anthropic: Introduction to Model Context Protocol
  - HackerRank Intermediate in SQL.
- **Agile & Project Management:**
  - Agile Scrum Master
  - Introduction to SAFe®
- **Finance & Strategy:**
  - CMI Level 7 in Strategic Management & Leadership Practice
  - Bloomberg Market Concepts (BMC), ESG & Finance Fundamentals
  - McKinsey & Company: The forward program

Additional Information

- **Right to Work:** Eligible to work full-time in the UK.
- **Languages:** English , Malayalam, Hindi , Urdu , Tamil.
